TOL-0012 - Stone details

Green, yellow, orange and blue flash through this round Lightning Ridge crystal opal. Its color patches change with angle, showing different parts of the display as the cabochon turns.

Lightning Ridge crystal opal. Semi-translucent.

Weight and measurements

Recorded scale readings range from 1.000 to 1.005 ct; listed as approximately 1 ct. Approx. 6 x 6 x 4 mm (length x width x thickness), read from caliper photographs and rounded to whole millimeters. Have a jeweler measure the actual stone before making a setting.

Condition

Natural sand spots remain on the reverse. The face-up linear effect is color flash, and the previously seen black dot is no longer present, as confirmed by the cutter.

Purchase and cutting history

Purchased in the rough from Hopkins Opal at the Tucson gem show, then cut by The Opal Ledger. These are our firsthand purchase and cutting declarations. No laboratory report accompanies the stone.

Viewing record

Photographs and silent video show this exact stone. Color changes with light, viewing angle, camera and display. Loose stone only.
